

VacuEasylift VM160 sack lifter low headroom

Project supervisor:
Marek Radosz, Albertina Poland
Project number: -
Project engineer: -
Industry: Food industry
Lifting: Sacks
Used with: VM160
Max capacity, this version: 60 kg

Extremely low headroom is solved with a VM160 sack lifter with wider spiral distance: lifting height 1800 mm with ceiling height 2700 mm!

The Lyftman jib crane is the type UVM which handles up to 80 kg with arm max 3 m.
It is attached to the existing structure with a clamp system and the vacuum pump is placed on a shelf beside it.

The project is available on video! Go to the Download-area at www.tawi.com
